REMARKS

This response responds to the Office Action dated July 10, 2001, in which the Examiner rejected claims 1 and 12 under 35 U.S.C. § 103.

Claim 1 claims a semiconductor device comprising an active area and an insulating film. The active area is provided with at least one MOS transistor. The insulating film defines the active area. The active area is set in a shape having a concave part in a shape along a plan view. The active area is provided with an ordinary region and a depressed region having an edge portion which is depressed beyond the ordinary region due to the presence of the concave part. The at least one MOS transistor includes first and second MOS transistors. The first MOS transistor is formed in the depressed region. The second MOS transistor is formed on the ordinary region.
